1 – Introduzione

Il Test Execution Report descrive i dettagli dell'esecuzione di ogni test case realizzato, realizzando la differenza tra il comportamento atteso e il comportamento osservato dal sistema in esecuzione, riportando le eventuali anomalie riscontrate. Ogni test execution specificherà il test case a cui è riferito, la data del report, l'output atteso, l'esito e le eventuali anomalie. L'esito rilevato sarà **"Failed"** nel caso in cui il risultato osservato coincida con quello atteso, altrimenti sarà **"Passed"**.

2 – Relazioni con altri documenti

I documenti a cui facciamo riferimento per il "Text Execution Report" sono:

- ElTanqueWineBar – Test Plan
- EltanqueWineBar – Test Case Specification

3 – Test Execution

Di seguito sono elencate tutte funzionalità introdotte nel sistema che sono state sottoposte a test, suddivise per ogni gestione del sistema.
